FOREWORD

Only a few decades ago, roads in this country were largely built with the help of manual labour and no mechanical equipment worth the name was used except the road rollers and trucks. The picture now is entirely different. Rigorous standards prescribed now for roads which have to carry heavy and fast moving traffic necessitate introduction of mechanised construction. Control on the quality of road construction is far better if machines are used right from building up of the embankment to the laying and finishing of the road surface. Thus mechanisation not only helps in quick execution but provides longer life and brings in substantial economy in the maintenance cost.

Large scale use of road making machinery was first resorted to in the year 1961 when several road projects were taken up for execution, to be completed within a very tight time schedule and according to rigid specifications. As very little road making machinery was being manufactured in the country at that time, most of it had to be imported. Since then the Indian Roads Congress is pursuing the manufacture of machinery in the country through its Highway Construction and Mechanisation Committee with the Ministry of Heavy Industries and the Directorate General of Technical Development. We are proud that today, by and large, all the road and bridge making machinery, with the exception of few sophisticated items, are being manufactured indigenously.

The Indian Roads Congress has now brought out a Special Publication giving names of the manufacturers of various kinds of road/bridge making machinery, their sizes, capacities, descriptions, etc. I am sure this publication will serve as a useful guide for highway engineers responsible for planning and execution of highway projects.

Although every effort has been made by the Indian Roads Congress to include the names of all leading manufacturers in the publication, it is quite possible that the names of some manufacturers may have been left out. It is requested that such manufacturers who do not find their names in the publication, should send their details to the Secretariat of the Congress for inclusion in the subsequent edition of this publication.

K.K. Sarin
Director General (Road Development) &
Addl. Secretary to the Govt. of India

PREFACE

(To the Second Edition)

The directory on this subject was first brought out in 1984. During the last decade, there have been lot of improvements in the methodology and techniques in the construction of road and bridge works. A number of large sized road and bridge works are now being executed in India with financial assistance from World Bank, Asian Development Bank, OECF Japan etc, deploying latest equipment. Rapid mechanisation in the road sector has created a great demand of latest sophisticated road/bridge construction machinery. To meet the demand, a large number of indigenous manufacturers have started manufacturing latest road construction machinery independently or in collaboration with foreign firms. This has, therefore, necessitated updating of existing directory of manufacturers of road/bridge construction machinery.

2. This Second Edition of the Publication has been renamed as "Directory of Indigenous Manufacturers of Road/Bridge Construction Machinery & Important Bridge Components". A new Section containing "Names of the Companies and their Products" has been added to it to improve the utility of the updated Directory.

3. It may be noted that the Directory is only intended to give ready information about Road/Bridge Construction Machinery being manufactured in the country. The firms enlisted may or may not be registered with Government Organisations like Directorate General Supplies & Disposals, Director General Technical Development and Small Scale Industries Department. This Directory should in no way be taken as an approved list of suppliers of equipment.

4. A number of individuals have contributed to the finalisation of this directory. I would like to specifically place on record the untiring efforts put in by S/Shri D.R. Gulati, Chief Engineer (Mech.), R.N. Malik, Superintending Engineer (Mech.), B.D. Makkar, Executive Engineer (Mech.) in the Ministry.

5. In spite of all efforts, there may be shortcomings and errors. Any suggestions in this regard be sent to the Indian Roads Congress for necessary changes in subsequent editions of the Publication.

NEW DELHI
APRIL, 1994.

D.P. GUPTA
Director General (Road Development) &
Addl. Secretary to the Govt. of India

INDEX

No road is complete without **AUTOMARK & AUTOMAT**

AUTOMARK-AUTOMAT Road Safety Products sold throughout India, show the exceptional importance of company's perfection in Traffic Engineering. Our vision for future is to highlight the importance of Road markings and Cateyes in road safety. Our policy is to apply our experience and knowledge to overall concept of road

safety.

Through continued investment in development, training and quality assurance within our group organization, AUTOMARK-AUTOMAT is well equipped to meet the demands for Road marking equipments, Cateyes and other road safety products in India of the future.

NO PLY, NO BOARD, NO WOOD.

NOW ONLY NUWUD®

Consider the advantages of Nuwud MDF. And you will know why this internationally
VALUE FOR MONEY
acclaimed wood substitute is fast replacing ply, board and wood in homes, offices and

industry. In the shape of ceilings, doors, flooring, furniture, mouldings, panelling, partitions,
DESIGN FLEXIBILITY
windows... an almost infinite variety of woodwork. Whatever you make with NUWUD MDF,

its durability, versatility, texture, the sheer richness of its looks, feel and economy will simply
VERSATILE FINISH
delight and amaze you. So, if you have woodwork in mind, just think NUWUD MDF.

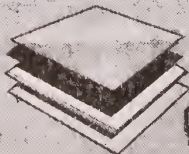

NUWUD MDF advantages :

Homogeneous Uniform strength. No knots. Pre-seasoned. Easy workability. Warp, crack, chip & split resistant. Unbeatable machinability and durability. Termite and fungus resistant. Fire retardant. Moisture resistant. Compatible with all kinds of surface finishes. Cuts production costs and wastage. Conforms to Indian and International standards.

NUWUD MDF is available in simple board form and can be used like the finest seasoned timber and finished to your choice.

THE DYNAMIC HEAVYWEIGHT

Escorts Dynapac CA-251 Vibratory Roller - 10 MT Class

Incorporating state-of-the-art technology from world leader Dynapac A B, Sweden, the Escorts Dynapac CA 251 series vibratory rollers are ideal for a range of compaction needs. From roads, highways, irrigation canals, dams, railways, airports, haul roads, fly ash to coal compaction and so on.

Available in four versions

Easy convertibility across range.

- CA 251 STD : Smooth Drum.
- CA 251 D : Smooth Drum, with Drum Drive.
- CA 251 PD : Padfoot Drum with Drum Drive.
- CA 251 A : For Asphalt Compaction,

Key Features

- High productivity and high degree of compaction
- Highest gradeability
- Failsafe Parking / Emergency & Hydrostatic Service Brakes.
- No - spin differential.
- Hydrostatic Drive
- Two-speeds with electric changeover on the run
- Low maintenance

Highest population of machines in use - a tribute to lasting reliability, backed by Escorts' excellent after-sales service through its nationwide network of dealers and branch offices.

Attention CONTRACTORS!

BUILD AIDS announces the introduction of **"RAM" VIBRATORY SCREED** a modern concrete flooring equipment for most economical concrete paving.

- Extremely fast construction times
- High degree of floor flatness and levelness
- Self propelled and adjustable length
- Crown and valley adjustments
- Full vibration of concrete upto 250 mm thick.

**CONTACT
BUILD AIDS**

19, Conotaph Road, Teynampet,

Committed to mechanised construction

Attention CONTRACTORS!

BUILD AIDS announces **"RAM" UNIVERSAL HOLE SAW**. A machine for core drilling through tough materials with least disturbance to the parent body.

- Diameter range 25 mm to 100 mm
- Ideal drilling on concrete, brick work, stone etc. 360° swivel action
- Uses diamond tipped drillbits
- Useful for testing labs for failure investigation

**CONTACT
BUILD AIDS**

Committed to mechanised construction

Attention CONTRACTORS!

Don't waste your plastering material and labour. Use **"BEST" SPRAY PLASTER MACHINE** to decorate your building walls

- Protects wall from moisture
- Painting & Whitewash not needed
- Easy to handle and speedy process
- Grey & coloured plaster
- No levelling or putty
- Low cost plastering
- Even spray due to machine throwing
- Saves labour

BUILD AIDS proudly announces the introduction of **NEW and IMPROVED "RAM" POWER TROWEL** machine fitted with new fuel efficient **SHIRURAM HONDA** engine.

- Lighter design
- Improved performance
- Fuel economy with **SHIRURAM HONDA** engine
- Excellent and durable floor finish with imported 2 mm spring steel Trowels.

Amachine to finish concrete floors for factories. Does the work of 8 men.
Offered from the house of largest manufacturers of

Power Trowels in India.
